Thoresby

- For your safety, we have a “six metre rule” which means that units (excluding guy ropes) must be 6 metres apart from adjacent units in order to protect against fire;
- The unit (along with any ancillary equipment) must fit within the confines of your pitch whilst maintaining the 6 metre rule. If this cannot be achieved you may need to purchase an additional pitch (if available) or remove the ancillary equipment;
- Toilet tents may only be erected within the confines of the pitch; and
- All loose equipment needs to be stored within the confines of your unit.
- You must ensure that the mains electrical cable from the hook up point to your unit and the unit’s installation are safe. All units should be protected by a residual current device (RCD). For tent campers, this should be incorporated into a purpose made mains supply unit designed for tent camping conditions.
- You may park your vehicle(s) between units, provided that 3m clear space is left within the 6m gap, Vehicles on site should be parked at right angles to a slope where possible.
